

A Gig Idea

'Six Word Story' Storyboarding Template

Use this space to **draft a six word story** – a story told in only six words – to describe a gigabit technology idea that could serve as a solution to a personal or community challenge.

Here are some things to consider:

- Think of a challenge in your classroom/community that could be addressed with the development of new technology layered on an advanced gigabit network.
- What would that technology be?
- What would it enable you, your students, or your community to do?
- What would the impact be?

A Gig Idea

'Six Word Story' Storyboarding Template

Use this space to sketch an image - or write describe of the image you would like to use - to serve as the backdrop for your story.
